Hey bear. Where are you?

I've just gotten accepted into a program in Egypt this December. I'm pulling on all my resources to make it happen.
Wondering if you have extra miles to activate my wings ...
I need to fly.
to activate my throat chakra, to rise up and speak out, up and heal our world.
❤️❤️❤️

Egypt is also to study Sacred Sound currents. Vibrational healing. Sacred geometry.

I need to build a Love Temple and Sound Sanctuary in Big Sur. Give all the people passing through here a real experience. Those that can't go to Esalen.
Healing hearts.
A Taj Mahal to love.
The Beloved

At sycamore canyon, Make sure you tell them that you're visiting a friend on Front Hill Otherwise they will hassle you

Sep 2, 2018, 4:48 PM

Now where are you???

Fucking flat tire in San Jose I swear I'm coming obviously a little scared and beaten down and trying to hold onto what is killing me- misery is my addiction

Dang!
Why are you in San Jose??

When the coast is most beautiful
And the one is open...

Because my car has a special back that most tow shops don't so they had to put in flat bed and drive me back sorry south and the tire gy is saying he doesn't want to mess with it. It's a really stupidly expensive car I had shopped from DC

So mike I'm trying to find someone who would ol

Love is medicine
Always here
What are you driving?

I kjew the tire was leaking before I left

Porsche 911 Turbo S
The fastest production car ever made

And Hallie will not stop torturing me - she's truly been so awful so m am so entitled that I swear Deva if I thought it wouldn't kill my father I'd just disappear and dissolve into nothing

It seems such a rational choice sometimes

But you're a bear

And you have a greater mission in being here

Consumer of other's demons
lover of life ...

Call upon the Phoenix
and rise from the ashes
of your own demise

Hold onto your breath ...

Love is like the ocean.
Some days it is glassy and smooth.
Sweet waves that hold you effortlessly. Strong currents.
Pure inspiration.
Some days it is nothing but close outs and wind swell. It's straight up messy and chaotic.
I need solace on the shore.
It teaches patience.
It pummels me
And turns my world upside down.
Some days warm and gentle,
Others cool, crisp and refreshing.
It terrifies me. Spanks me.
I am learning to surf the inner waves.
Emotional tidal pools.
It calls for close observation.
Holding the essence of life.
Mysterious and magical.
Never the same.
Always changing
Yet ever present.
A constant source of renewal.
I am humbled and enchanted by all that it holds.
Constant teacher.
Companion.
Friend for life.

Love is as vast as the ocean is deep.
As all encompassing as the ocean is wide.

Playful like a dolphin and misunderstood and scary like a shark.

Take care of yourself.

It's okay.

Maybe it's not the right time

Just because you leave this body doesn't mean your karma leaves you.
Better to face it in this lifetime

I'm not going to kill
Myself Deva I meant just giving up on being here in this here

Thanks beautiful.
A good friend died on our ranch last month. Feeling sensitive to the veils between the worlds ...

There's a drum circle on the ridge tonight... thinking I might pop over
Keep me posted on your timing

You have to remember I'm just a farm girl from Oregon...
but I like bears
And all things wild and free

And I'm here on a mission to build transformational Love temples ...
Regarding these vastly more important temples, Robert Lawlor explains that for the ancient Egyptians "The temple was a center of the learning and dissemination of a psycho-physical and spiritual science whose purpose was to reveal and develop symbolic, intellectual and physical techniques which might effect perceptual, behavioral and physiological changes in the human organism - a science having the purpose of gradually leading towards humanity's highest conceivable evolutionary potential, towards the appearance, that is, of a Divine or Supra-Human, an organismic being who has mastered the contingencies and dualities of mortal existence". (For more on this matter see Lawlor's chapter, Ancient Temple Architecture, in Homage to Pythagoras, edited by Bamford, Christorpher)

These are the type of temples we need to build

Here's a cool site to check out while you're waiting for the seal
